09/07/10 - Mildura Weekly 7 Sunraysia is home to the largest Norfolk Island Pine in Victoria...

Green is truly

tree-men OUS

By BEN PISCIONERI

SUNRAYSIA is now officially home to the largest Norfolk Is-

and Pine tree in Victoria.

The green giant, estimated to be 97-years-old and measuring 41 metres high, with a circumference of 4.55 metres, is so large it's now registered with the National Register of Big Trees. The tree has enjoyed a domi-

nant presence in the front yard of a Karadoc Avenue house, near Nichols Point, for decades, and was recently brought to the at-tention of the Register's founder, Derek McIntosh, by Melbourne-based tree lover Andrew Black-

Mr McIntosh said the tree was also registered with the National Trust of Australia, where it's described as "a specimen of outstanding form" and "possibly the tallest tree in the Mildura district.

He said there are only eight Norfolk Island Pines on his register, and Mildura's is certainly

It's one of three Sunraysia-based trees on the National Register of Big Trees, which only came into being just over 12 months

ago.
The other two trees are a Queen-sland Narrow-leaf

Bottle, which is planted on the Rio Vista Home-stead property, and a Sugar Gum in Elswood Crescent. The 110-year-old Bottle mea-

sures 10.5 metres high and 4.4 metres in circumference. The Sugar Gum meanwhile is 23 metres tall and has a circumference of six metres.

Mr McIntosh said his almost life-long love of trees drove him to set up the register.

and is based in Sydney. After retiring from a career in

real estate development, he was finally able to dedicate his time to his love of trees and promptly compiled a team of botanical experts and went ahead with the National Register of Big Trees.

Green giant is truly tree-mendous

From Page 7

Despite only being in existence for a little over 12 months, Mr McIntosh said there has been signif-icant interest in the concept. "When I started

in May last year I had

about 18 trees in the Sydney Botanic Gar-dens to kick things

off," he said.

There are now more than 430 trees on the register.

"I've put most of them on, but I've had a wonderful amount of support from a fellow down in South Australia, Dean Nichol, who's an expert on Eucalyptus and has written a few books. He's put on about 60 trees, so he's been fantastic,"

Mr McIntosh said. "But I'm increasingly getting nomina-

tions out of the blue. People who may have heard about the reg-ister or read about it and it's now develop-ing, so the response has been wonderful."

He said his main

priority is the size of trees.
"I look objectively

at a tree for its size,"

Mr McIntosh said. "It doesn't matter if it's a tree of historic significance or of great beauty. It's all about the size of the

Trees are ranked on a points system based around a formula that includes girth, height crown spread.

Trees must be either Australian na-tives or naturalised
